

Carlos Martinez

FRONTEND SOFTWARE ENGINEER

Brooklyn, NY | ceejaymar@gmail.com | [los.codes](https://www.linkedin.com/company/los.codes) | [LinkedIn.com/carmart](https://www.linkedin.com/company/carmart) | github.com/ceejaymar

PROFESSIONAL OVERVIEW

- **Software Engineer** with 5 years of experience building scalable, accessible, and high-performance web applications that translate complex business requirements into clean, user-friendly interfaces.
- **UX-focused engineer** who bridges engineering and design by turning Figma prototypes into polished, accessible, design-system-aligned UI.

SKILLS & TOOLS

JavaScript, TypeScript, React, React Native, Expo, HTML, CSS, Sass, Tailwind, Styled-components, Storybook, Next.js, Node.js, Express, SQL, SQLite, Cypress, GitHub Actions, Sentry, Posthog, RevenueCat

SELECTED PRODUCT WORK

Mosaic - Emotion Tracker | Founder & Product Engineer | App Store: apple.com/app/6760950155 Aug 2025 - Present

- Launched a production React Native app on the iOS App Store for privacy-first mood tracking and journaling.
- Created a polished UI with thoughtful mood check-ins, accessibility settings, and a calm journaling experience.
- Built local-first storage with SQLite/Drizzle protecting entries and keeping check-ins fast and available offline.
- Integrated production tooling: RevenueCat subscriptions, Sentry monitoring, PostHog analytics, EAS builds.

WORK EXPERIENCE

Yubico | Frontend Software Engineer II, New York, NY

Aug 2022 - Jan 2025

- Built an interactive product-selection quiz using React, TypeScript, and Tailwind CSS, driving a 60% conversion rate from quiz completion to the e-commerce storefront.
- Reduced reliance on engineering support by developing custom WordPress Gutenberg blocks, empowering marketing teams to create and manage page content independently with a tailored CMS.
- Expanded global reach by implementing internationalization (i18n) across React-based WordPress plugins, enabling support for 5 new languages in key international markets.
- Established end-to-end testing with Cypress to ensure reliability across critical user flows, catching regressions in landing pages, search functionality, and custom WordPress components.

One Drop | Software Engineer (Web), New York, NY

Jun 2020 - Mar 2022

- Streamlined onboarding for enterprise client employees by building a complex, multi-step questionnaire web app that used branching logic to improve form completion rates and guide users toward suitable offerings.
- Accelerated mobile onboarding feature rollout by integrating web-based flows into iOS and Android apps via web views, avoiding months of native development time while ensuring design consistency.
- Built the core dashboard UI for a secure, HIPAA-compliant provider portal, enabling healthcare teams to visualize patient metrics and manage treatment plans.
- Mentored 4+ junior engineers through code reviews and technical coaching, leading team-wide efforts to standardize coding practices and improve code consistency.

Pursuit | Full-stack Web Assistant Instructor, Long Island City, NY

Sep 2018 - May 2020

- Guided 32+ students through web development fundamentals via weekly code reviews and pair programming, reinforcing best practices in maintainable, scalable code.
- Delivered workshops covering the full-stack (Node.js, Express, PostgreSQL), frontend styling, accessibility, and technical best practices.

Microsoft | Software Engineer Intern, Redmond, NY

Nov 2017 - Mar 2018

- Built a proof-of-concept testing framework in C# for an internal survey application, laying the groundwork for automated validation and improved platform stability.
